CONNECTED, SEAMLESS OPERATIONS

WITH ADVANCED HEALTHCARE COMMUNICATIONS & SECURITY

Hospitals and other health service facilities work with the latest technology and techniques to accomplish amazing medical feats on a daily basis. It should be no different when leveraging modern, integrated tools for seamless communication and security.

WI-FI NOT HOLDING UP? WHAT ARE YOUR OPTIONS?

The trouble is, while your staff rely on a range of data applications — including security, productivity, work order ticketing, and patient data apps — to do their jobs, your Wi-Fi isn't holding up to its end of the bargain. As patients, visitors and staff wrestle for bandwidth, the demands these applications place on Wi-Fi takes it's toll and can cause costly delays for staff and frustration for patients.

For organizations that require an even larger data pipe, Citizens Broadband Radio Service (CBRS) overcomes the limitations of Wi-Fi and provides a more efficient alternative. CBRS gives commercial enterprises two-times the capacity and up to four-times the range of Wi-Fi. That's where MOTOTRBO® Nitro™ comes in. You can now leverage this platform for any device ranging from something as simple as a tablet or two-way radio, to the software hosting your private security video feeds.

THE RIGHT DEVICE FOR THE RIGHT USER

No matter the device or network you use, this should never exclude you from the conversation or limit your access to certain applications. And you certainly shouldn't have to carry multiple devices to do your job effectively.
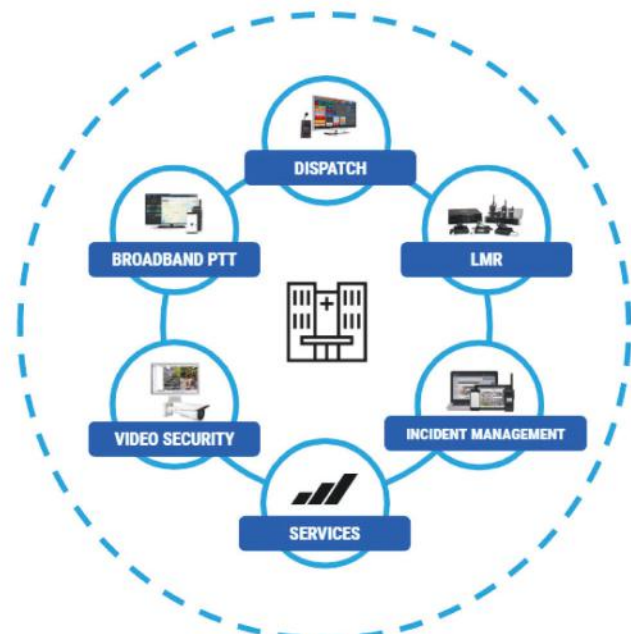

With a Team Communications suite designed for healthcare, you can get the right information to the right people, the moment they need it.

MOTOROLA SOLUTIONS

YOUR END-TO-END SOLUTION FOR CONNECTED TEAMS

POWERFUL ALONE.
GAME-CHANGING TOGETHER.

Working with Motorola Solutions is not just an investment in a platform. It's an investment in a partnership. As a leader in innovation, we invest millions of dollars in R&D and acquisitions to bring you a robust, end-to-end portfolio for healthcare organizations.
